EQUALITY IN SMOKING & DISEASE
nobody wins!

Nearly 20 million women and girls in the United States smoke cigarettes.

In the last 50 years, a woman’s risk of dying from smoking has more than tripled and is now equal to a man’s risk.

WOMEN OVER AGE 35 WHO SMOKE have a slightly higher risk of dying from heart disease than men who smoke.

MORE THAN 200,000 WOMEN DIE EVERY YEAR from smoking-related disease compared with 270,000 men who die from smoking-related disease every year.

WOMEN SMOKERS SHOULD QUIT SMOKING.
For help, they can visit women.smokefree.gov or call 1-800-QUIT-NOW.
